Dear Kimberly,

Yes. Nov 20th would work.

Early afternoon is good or after 11 AM in the morning (I will be teaching until 10:45 AM).

Thanks.

Best,
Kun

Dear Kris,

Thanks for the follow-up.

Dr. Lu, can you confirm that November 20th in the morning-early afternoon would work for you as well?

Kimberly,

Only the morning-early afternoon of November 20th seems to be an option for me and the team leads.

Sincerely,

Kris

Dear Kris,

Based on your availability, how about targeting November 12th, 13th, 19th or 20th? Dr. Lu, are any of these dates better for you based on your schedule.

For length, if EPA scheduling permits, ~1 hour to review the research and address EPA questions, then approximately 30 minutes to tour the laboratory facilities.

Kind Regards,

Kimberly – my October is a total disaster with travel and I'm on annual leave the week of November 5th. Can we aim for a bit later in November?

And how long were you thinking for the teleconference and web participation portion – 1 hr?

Sincerely,

Kris

Dear Kris:

Thanks for the follow-up. Teleconference and web participation could be facilitated at UNC. Let's look at some dates the week of October 22nd, the week of October 29th and the week of November 5th to see if we can find something that works.

Kind Regards,

Thanks Kimberly,

I could certainly meet at UNC because I'm local, but the core formaldehyde team is in Washington DC and we need to be vigilant to limited travel resources. So, at least part of the meeting will need to be remote to DC. If held at EPA-RTP, then we use a video connection. If at UNC, then we can do that portion via audio/skype/adobe.

Thoughts?

Sincerely,

Kris

Dear Kris,

I have had an opportunity to speak with Dr. Lu and if possible the preference would be to meet at UNC given his laboratory and teaching responsibilities. It would also give the EPA scientists an opportunity to tour the laboratory and the analytical equipment used in the research. Dr. Lu can you provide some specific dates in late October or early November that work best based on your schedule?

Kimberly,

Thanks for your well wishes, breezy here at the moment with rain but not continuous (yet).

The formaldehyde team is based in DC. Can we arrange a meeting there? If travel is an issue for the UNC researchers perhaps we can explore video or other remote attendance options.

I have an very heavy travel schedule in October and not really available until the last week in October. Is that a possibility?

Sincerely,

Kris

Dear Dr. Orme-Zavaleta,

Previously, the ACC Formaldehyde Panel alerted the Agency to ongoing formaldehyde research at the University of North Carolina. Specifically, the research includes a 28 day in vivo (nose only) inhalation study where rats were exposed to radio-labeled formaldehyde at 0, 1, 30 or 300 ppb. Following exposures, tissue samples were collected from the nasal and upper respiratory tract, lung, bone marrow, liver, cerebrum, hippocampus, olfactory bulb, blood and plasma, for analysis. The research is now complete, will be presented at the 2018 EuroTox meeting (see attached abstract) and the UNC scientists are working to prepare a manuscript for submission to a peer reviewed journal. Dr. Swenberg has recently retired and Dr. Kun Lu leads the research activities. We would welcome the opportunity for EPA scientists and UNC researchers to meet and discuss the research findings. Is there a time in the near future to schedule an in person meeting at UNC with the researchers?
